Upon APPLICATION

Please send it back by email to Elodie BEDU: bedu@igbmc.fr ; 33 (0)3 88 65 57 28

This survey is optional. The recipient of these data is the science director(s) of the training course to which you are registered or pre-registered; it will enable the training program to be adapted as closely as possible to your expectations and those of the other trainees. The data will be destroyed at the end of the internship. For more information about the use of your personal data, please consult the "Data Privacy Statement" on our website.

Name:

Institute/Service /Team:

By which way did your hear about this course?

****
Do you use animal model for your scientific activities?
1-YES   2-NO

If so, which one?

Understandings in phenotyping: *please choose one*   Excellent-Good- Reasonable-Poor
Understandings in embryology: *please choose one*   Excellent-Good- Reasonable-Poor

Regarding the topic "Mouse embryology practical training course", do you consider yourself as
Novice - Low skilled – Experimented - Expert   *please choose one*

Did/Do you already dissect of postimplantating embryos?
Never- sometimes - often - Always   *please choose one*

Did/Do you already work with embryos at neonatal stage?
Never- sometimes - often - Always   *please choose one*

Did/Do you already use histological technics?
Never- sometimes - often - Always   *please choose one*

YOUR NEEDS

◼ When attending the course, do you want to acquire <u>a new</u> expertise <u>which does not match</u> with your current professional activity?
1-YES   2-NO

◼ The Course keywords are: Experimentation, Mouse, Physiology, Phenotyping, Mouse development, Embryos, Dissection, Histology, Confocal imaging, Lac z staining

Do your needs match with one or more of these key words?
1-YES   2-NO

If so, what are the dedicated <u>2 most</u> specific key words among the list below?

◼ Could you please define the more important scientific or methodological problematic you want to be addressed during the course?

◼ What kind of <u>expertise</u> would you like to gain from the course?
